3. Enclosed with this Notice is a copy of the international application as published by the International Bureau on
28 December 2000 (28.12.00) under No. WO/00/79595

REMINDER REGARDING CHAPTER II (Article 31(2)(a) and Rule 54.2)

If the applicant wishes to postpone entry into the national phase until 30 months (or later in some Offices) from the priority date, a demand for international preliminary examination must be filed with the competent International Preliminary Examining Authority before the expiration of 19 months from the priority date.

It is the applicant's sole responsibility to monitor the 19-month time limit.

Note that only an applicant who is a national or resident of a PCT Contracting State which is bound by Chapter II has the right to file a demand for international preliminary examination.

REMINDER REGARDING ENTRY INTO THE NATIONAL PHASE (Article 22 or 39(1))

If the applicant wishes to proceed with the international application in the national phase, he must, within 20 months or 30 months, or later in some Offices, perform the acts referred to therein before each designated or elected Office.

For further important information on the time limits and acts to be performed for entering the national phase, see the Annex to Form PCT/IB/301 (Notification of Receipt of Record Copy) and Volume II of the PCT Applicant's Guide.

INTERNATIONAL PRELIMINARY EXAMINATION REPORT

International application No. PCT/GB00/02256

I. Basis of the report

1. With regard to the **elements** of the international application (*Replacement sheets which have been furnished to the receiving Office in response to an invitation under Article 14 are referred to in this report as "originally filed" and are not annexed to this report since they do not contain amendments (Rules 70.16 and 70.17)*):

Description, pages:

1-25 as originally filed

Claims, No.:

1-15 as received on 25/09/2001 with letter of 21/09/2001

Drawings, sheets:

1/17-17/17 as originally filed

2. With regard to the **language**, all the elements marked above were available or furnished to this Authority in the language in which the international application was filed, unless otherwise indicated under this item.

These elements were available or furnished to this Authority in the following language: , which is:

- ☐ the language of a translation furnished for the purposes of the international search (under Rule 23.1(b)).
- ☐ the language of publication of the international application (under Rule 48.3(b)).
- ☐ the language of a translation furnished for the purposes of international preliminary examination (under Rule 55.2 and/or 55.3).

3. With regard to any **nucleotide and/or amino acid sequence** disclosed in the international application, the international preliminary examination was carried out on the basis of the sequence listing:

- ☐ contained in the international application in written form.
- ☐ filed together with the international application in computer readable form.
- ☐ furnished subsequently to this Authority in written form.
- ☐ furnished subsequently to this Authority in computer readable form.
- ☐ The statement that the subsequently furnished written sequence listing does not go beyond the disclosure in the international application as filed has been furnished.
- ☐ The statement that the information recorded in computer readable form is identical to the written sequence listing has been furnished.

4. The amendments have resulted in the cancellation of:

- ☐ the description, pages:
- ☐ the claims, Nos.:

**INTERNATIONAL PRELIMINARY

☐ the drawings, sheets:

5. ☐ This report has been established as if (some of) the amendments had not been made, since they have been considered to go beyond the disclosure as filed (Rule 70.2(c)):

(Any replacement sheet containing such amendments must be referred to under item 1 and annexed to this report.)

6. Additional observations, if necessary:

V. Reasoned statement under Article 35(2) with regard to novelty, inventive step or industrial applicability; citations and explanations supporting such statement

Sections VIII & V

1. The Application does not meet the Requirements of Art.6 PCT because the amended claims are not clear.
 - 1.1 Claim 1 is not clear in that it does not include sufficient information for the skilled person to carry out the steps of the invention, cf. "selecting a scaling factor", i.e. it does not define how the scaling factor is to be calculated without violating the essential design rules, cf. Description pg.3 lines 13-18. Moreover, the claimed step of "adjusting each layer in the circuit for functionality ..." may involve a further scaling up or down of an entire layer after general scaling is complete, cf. pg.7 lines 16, pg.22 lines 10-11, pg.19 lines 18-23 etc, thus creating further uncertainty in view of the prior general reference to "selecting a scaling factor". In other words, it is not apparent what is intended by the claimed process which selects a single scaling factor, scales the entire circuit, then resizes entire layers, since the last step is not consistent with the essential step of selecting a single scaling factor, cf. the Applicant's response, Section 2.1, par.1. Accordingly the claim is not supported by the description.

**INTERNATIONAL PRELIMINARY
EXAMINATION REPORT - SEPARATE SHEET**

International application No. PCT/GB00/02256

- 1.2 The wording of the claim 1 is ambiguous, Art.6 PCT; any order of process steps is possible (the steps may thus be performed in any combination, including that of simultaneously - e.g. like a layout engineer manually correcting a part of a shrink design).
- 1.3 Claim 3, in its generality, is unclear in that it is not apparent which scaling factors are "predetermined", how they are predetermined & in what sense they are predetermined: the layout engineer working on a data model of an integrated circuit will normally work on a predetermined layer thereof & it is not apparent, from the claim wording, what is meant by selecting the largest of some predetermined scaling factor.
- 1.4 The "transistor edge adjustment process" of claim 9 is not identified - all transistors have edges which will be adjusted in a shrink process.
2. In view of the unclarity of the claim, the present application does not satisfy the criteria set forth in Art. 33(2) & (3) PCT because the subject-matter of claim 1 is either not new or is not inventive in respect of prior art as defined in the regulations (Rule 64(1)-(3)).
- 2.1 In view of the lack of clarity of the claim, D1 discloses a method having all its steps. In particular, it is not apparent from the claim that a single scaling factor is selected. Accordingly D1 discloses:

A method of modifying a data model of an integrated circuit by electronic means (cf. Abstract), wherein the data model includes at least one layer of circuit components wherein the method including the steps of:

- selecting a scaling factor (col.1, lines 43-50 & col.2 lines 17-19)
- scaling the entire circuit represented by the data model according to the scaling factor (col.2 line 50 to col.3 line 16)
- adjusting each layer of the circuit for functionality (col.3 lines 24-34) and design rule compliance (col.3 lines 19-23)

**INTERNATIONAL PRELIMINARY
EXAMINATION REPORT - SEPARATE SHEET**

International application No. PCT/GB00/02256

- 2.2 A further objection of lack of novelty of claim 1 is made with regard to D2, cf. Abstract, by inspection. In this regard, the Applicant's arguments that there is no adjustment of layers for functionality is not convincing since this is either implicit to any working design or is immediately apparent from the skilled person's general knowledge.
3. The present claims are not allowable for these reasons.
4. Regarding subject-matter of the Application which may meet the requirements of Arts.6,33(2),33(3) & Rule 67, it appears from a consideration of claims 1,3 & 4 & the Description pg.3 lines 13-18, pg.6 line 22 to pg.8 line 8 & pg.10 line 19 to pg.11 line 11, that the invention concerns a selection of the ideal scaling factor of a layout by calculating the largest of the three interconnect, via & transistor geometry ratios, then scaling the entire circuit in accordance with this ratio and then adjusting the circuit for functionality & design rule compliance. Such subject-matter appears neither to be known from or be obvious with respect to the available prior art.
